

Design Intent

The overall design philosophy is based on a minimalist asian concept. It endeavours to create a functional stylish extension to the home.

Entertaining

The open entertaining area is simplistic and clean offering unhindered views to the pool, spa, and canal beyond. The lawns are formal lush emerald "Zoysia empire". Frangipani, scarlet red tipped photinia screens to the sides and the planterbox is filled with dwarf sacred bamboo.

Asian Courtyards

The courtyard is a combination of Asian influences, materials and plantings. 3 Timber platforms support a guarding warrior, stone lantern and waterbowl. Carved timber bollards depict the symbolism of traditional asian spirit..... peace and harmony. Plantings consist of bamboos, black aralia and mondo grass. The centre Courtyard features a timber daybed overlooking the spa & pool

The Entry

Granite tiles in charcoal create an axis line and provide direction through the house and open to light grey tiles and raw timber decking in the entertaining areas. Bamboos and Black Aralia with a Wisteria overhang and greet the entry.

The Driveway

The drive is a combination of exposed aggregate concretes, the bulk being a smooth rounded water worn white pebble with a small percentage of brown scattered through the mix. Squares of contrast brown exposed aggregate steppers lead the eye to the entrance.

The Streetscape

The view to the house from the street is minimalist, bold and begins the asian influences also evident in the house architecture. Uplit Japanese maples and a brilliant red Pistachio planted in decorative pebble and Japanese blood grasses are the most striking elements. Leafless bird of paradise nestle in feature saucers.
